Proceda offers our customers a wide range of technical papers, application booklets and intrusion manuals relating to material test equipment, in various languages download installation package sen4cap version 3.0 the Sen4Cap system installation package was divided into 4 parts To facilitate download: a zip archive containing all the necessary tracks and configuration scripts (not considering Maja, see below) [- 1.2GB]: install script à € "contains the installation scripts that are used to create distribution and for Install the system and the tool necessary for the integration of Sen4Cap processors in Snap RPM Binaries à € "RPM files for all other system components (Slurm, Orchestrator, Downloader, processors) A zip archive containing GIPP files [- 1.2GB]: files necessary for Maja 3.2.2 A zip archive containing the global dataset SRTM [- 16 GB]: files necessary by Maja 3.2.2 and Snap a zip archive containing The global SWBD dataset [- 900 MB]: necessary files from Maja 3.2.2. *To speed up the download, the dataset SRTM and SWBDs are also available for continent (Africa, Antarctica, Asia, Australia, Europe, North America, Oceania, South America). IMPORTANT: MAJA 3.2.2 à € "which is used by the Sen4Cap system for atmospheric corrections and non-valid pixel masking à €" is not included in the Sen4Cap system installation package and must be downloaded separately from the CNES website. However, Maja must be installed before performing the Sen4cap installer, as described in the software user manual. The Sen4cap installation script is looking for the executable and request its installed path position. Game known problems The previews of the SAFE and L2A product are not correct with range and can be too dark. The Safe validation step is marked with unresapicious products with a single tile with low-change band as invalid (NOTV). The website has display issues on Safari.
